

Catchment Communities Conference: Workshop B

Exploring solutions worksheet

1. Imagine your community's river catchment utopia –

What would it look like? How would it be? How would individuals, local communities, businesses and organisations be working together? What species would there be?

Feel free to draw or describe your river utopia in any way you wish!

2. Remembering the key issues from this morning (displayed around the room). What three things could your community or organisation do (in the near future) to start to tackle some of these issues and move towards your river catchment utopia?
